Server – Kura Sushi USA, Arcadia, CA — Aug 2025 – Present
Assisted guests with order screen navigation, app registration, & troubleshooting tech issues

Projects

Nail Appointment Booking System — Jun 2026 – Aug 2026
- Designed and deployed a full-stack appointment booking platform for a nail salon of a coworker, integrating a React frontend with a Node.js and Express backend.
- Implemented real-time availability checks using Google Calendar API integration and a MySQL database and temporary booking holds to prevent conflicting appointments

Mobile Bartending Business Web Platform — Jun 2026 – Jul 2026
- Recreated a coworker bartender's existing Squarespace website as a custom website hosted on GitHub Pages to reduce its recurring subscription fees.
- Rebuilt the original site's layout, styling, and content using HTML, CSS, and JavaScript to preserve its existing look and user experience.

Linux System Health Monitoring System — Apr 2026 – Oct 2026
- Automated real-time system logs of CPU, memory, and disk usage with GitHub Actions
- Implemented Linux utilities: top, free, df, awk, and grep for structured output formatting
